

PRINCE BAGHEL

Full Stack Software Engineer | React / TypeScript / Python

Bengaluru, India | +91 84454 58024 | pkbghl2@gmail.com | Notice: 30 days

Portfolio & case studies | github.com/mprinceb | linkedin.com/in/mprincebaghel

SUMMARY

Software engineer with 3+ years building interfaces, backend services and production integrations. Works across React/TypeScript, Python/FastAPI and PostgreSQL, including real-time collaboration, mobile applications and AI product integrations.

TECHNICAL SKILLS

Backend & data: Python, FastAPI, Node.js, Express.js, TypeScript, SQL, PostgreSQL, Redis, MySQL, REST APIs, WebSockets

Interfaces: React, Next.js, React Native, Electron, React Query, SQLite

Production: Docker, Kubernetes, ArgoCD, Git, CI/CD, Nginx, OAuth2/Keycloak, database migrations, background processing

EXPERIENCE

Software Engineer | Technoculture Research

June 2023 - Present

- Contributed React Native authentication, persistent state, messaging and voice flows for Ella, alongside backend service integrations, WebSocket scaling and production observability.
- Built real-time presence and chat features, organization-level retrieval, file operations, search and voice integrations for Echoes, an AI collaboration platform.
- Developed Electron/TypeScript services for FirstCheck, including encrypted SQLite persistence, schema migrations, role-based access and laboratory-device integrations with CRC validation and retries.
- Built FastAPI/PostgreSQL services for SXD robotics data processing; coordinated CPU/GPU workflows and designed deterministic artifact identifiers for safe retries and recovery.
- Implemented Kubernetes/ArgoCD delivery and Keycloak/OAuth2 integration. Owned a company-wide Dataman-to-ERPNext migration, connecting finance and operational workflows.

Frontend Engineer (part-time) | Agspert Technologies / AgSpeak

April 2023 - January 2025 | Remote

- Built React dashboards, implemented React Query caching in the React Native application, and developed an interactive Three.js 360-degree farm viewer.

Node.js Developer Intern | Toptrove Foundations

May 2023 - July 2023 | Remote

- Developed course-registration workflows, certificate download and verification, and a board-based dashboard for task assignment and progress tracking.

PUBLIC PROJECT

Markdown + Git Work Tracker | TypeScript / Node.js

Built a work tracker with deterministic Markdown storage, automatic Git commits, change history and owner/manager access. Source: github.com/mprinceb/md-task-tracker

EDUCATION

Bachelor of Computer Applications | Dharma Samaj College, Aligarh

July 2020 - October 2023 | Aggregate: 75%
