

PRINCE BAGHEL

Software Engineer | Backend & Full Stack

Bengaluru, India | +91 84454 58024 | pkbghl2@gmail.com | Notice: 30 days
mprinceb.vercel.app | github.com/mprinceb | linkedin.com/in/mprincebaghel

SUMMARY

Software engineer with 3+ years building backend services, full-stack applications and production workflows. Strong in Python, FastAPI, Node.js, TypeScript, React and PostgreSQL. Experience spans distributed data processing, clinical desktop software, AI collaboration, mobile applications and system integrations.

TECHNICAL SKILLS

Languages and backend: Python, TypeScript, JavaScript, SQL, FastAPI, Node.js, Express.js, REST APIs

Interfaces and data: React, Next.js, React Native, Electron, PostgreSQL, MySQL, Redis, SQLite

Delivery and architecture: Docker, Kubernetes, ArgoCD, Nginx, Git, CI/CD, OAuth2/Keycloak, WebSockets, background processing, idempotency, database migrations

EXPERIENCE

Software Engineer | Technoculture Research

June 2023 - Present

- **SXD:** Built FastAPI/PostgreSQL services for robotics data processing, coordinating CPU/GPU workflows and object-storage delivery. Designed deterministic artifact identifiers for safe retries, reprocessing and recovery from partial failures.
- **FirstCheck:** Developed Electron/TypeScript services, encrypted SQLite persistence, schema migrations and role-based access. Integrated laboratory devices with message framing, CRC validation and retry handling.
- **Ella:** Contributed React Native authentication, persistent state, messaging and voice flows; implemented backend integrations, WebSocket scaling, observability, and PostgreSQL/Redis backup and restore infrastructure.
- **Echoes:** Built real-time presence and chat features, organization-level retrieval, file operations, search and voice integrations for an AI collaboration platform.
- **Business and field applications:** Delivered authentication and API integrations; owned a company-wide Dataman-to-ERPNext migration and continued workflow engineering. Project scope is documented in the portfolio.
- Implemented Kubernetes/ArgoCD delivery, Nginx and monitoring workflows, and Keycloak/OAuth2 integrations; mentored interns in Python and Frappe development.

Frontend Engineer (part-time) | Agspert Technologies / AgSpeak

April 2023 - January 2025 | Remote, Guwahati

- Built React dashboards, added React Query caching to the React Native application, and developed an interactive Three.js 360-degree farm viewer.

Node.js Developer Intern | Toptrove Foundations

May 2023 - July 2023 | Remote

- Developed course-registration workflows, certificate download and verification, and a board-based dashboard for task assignment and progress tracking.

SELECTED PUBLIC PROJECTS

Markdown + Git Work Tracker: TypeScript/Node.js tracker with deterministic Markdown storage, Git history and owner/manager access.

Taskboard: Frappe + React application with board/timeline views, member permissions, private attachments, invitations and reminders.

EDUCATION

Bachelor of Computer Applications | Dharma Samaj College, Aligarh

July 2020 - October 2023 | Aggregate: 75%
